## German Views

---

- ❖ CBHE as well as QA are still developing concepts
    - ❖ mobility, quality and cooperation traditionally thought rather from an individual perspective than an institutional one,
    - ❖ but changes under way, combining perspectives
  - ❖ QA collaboration on CBHE: the way to go
  - ❖ considering for the toolkit:
    - ❖ QA diversity to take into account (e.g. Germany: two-tier system, in general: different rules and regulations)
    - ❖ common understanding of CBHE in view of other areas of internationalisation also relevant for QA collaboration
    - ❖ fostering a culture to include QA from the beginning of CBHE projects and activities
-
